EXAMINER

COUSO, JOSE L

ART UNIT	PAPER NUMBER
2621	

DATE MAILED: 05/24/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b> 10/649,122	<b>Applicant(s)</b> KATAYAMA, HIROSHI	
	<b>Examiner</b> Jose L. Couso	<b>Art Unit</b> 2621	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 06 May 2005.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 21-25 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 21-25 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 2621

1. The rejection of claim 24 under 35 U.S.C. 112, second paragraph, has been withdrawn in view of applicant's amendment to claim 24.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

**(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.**

3. Claims 21-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Raychaudhuri et al. (U.S. Patent No. 5,122,875).

With regard to claim 21, Raychaudhuri describes a decoding means for decoding a plurality of coded signals and outputting respective decoded signals (see elements 306 and 308 in figure 10, and refer to column 18, line 62 through column 19, line 6); a storage means for storing said decoded signals (see elements 314 and 316 in figure 10, and refer for example to column 19, lines 10-13); and a select means for selecting a decoded signal corresponding to a coded signal which is in the decoding process of said decoding means, wherein said decoding means decodes each of said coded signals according to the respective decoded signal selected by said select means (see element 302 in figure 10, and refer to column 19, lines 14-17 and lines 27-68).

As to claim 22, Raychaudhuri describes wherein said decoding means decodes said coded signals according to time division multiplexing (refer for example to column 9, lines 51-58).

In regard to claim 23, Raychaudhuri describes wherein said decoding means decodes said coded signal by motion compensating and predicting according to said decoded signal (as clearly illustrated by element 304 in figure 10, also refer to column 19, lines 14-26 for the relevant discussion).

With regard to claim 24, Raychaudhuri describes wherein said decoding means inputs video signals which are coded in MPEG, and decodes said video signals according to a corresponding decoding procedure (refer for example to column 18, lines 60-62, which discusses the MPEG video signal, and refer to column 18, line 63 through column 19, line 67, which discusses the decoding procedure for an MPEG video signal).

As to claim 25, Raychaudhuri describes decoding a plurality of coded signals and outputting respective decoded signals (see elements 306 and 308 in figure 10, and refer to column 18, line 62 through column 19, line 6); storing said decoded signals (see elements 314 and 316 in figure 10, and refer for example to column 19, lines 10-13); and selecting a decoded signal corresponding to a coded signal which is in the decoding process, wherein each of said coded signals is decoded according to the respective decoded signal selected in said selecting step (see element 302 in figure 10, and refer to column 19, lines 14-17 and lines 27-68).

4. Applicant's arguments filed May 6, 2005 have been fully considered but they are not persuasive.

The examiner has thoroughly reviewed applicant's arguments on pages 5-6 but firmly believes the cited reference to reasonably and properly meet the claimed limitations.

Applicant argues, on page 6, lines 14-20, that "controller 302 merely controls VLD 308 and does not select a decoded signal (See Raychaudhuri column 19 lines 4-20)", the examiner respectfully disagrees. Element 302 in figure 10 controls the variable length decoders, i.e. elements 306 and 308. In controlling the decoders, element 302 selects the decoded signals according to whether the field/frame of input video data is intraframe encoded, a forward motion compensated P field/frame, or bidirectionally encoded field/frames and then decodes each of said coded signals according to the respective decoded signal selected (as discussed in column 9, lines 26-68, the different types of input data correspond to applicant's coded signals).

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2621

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

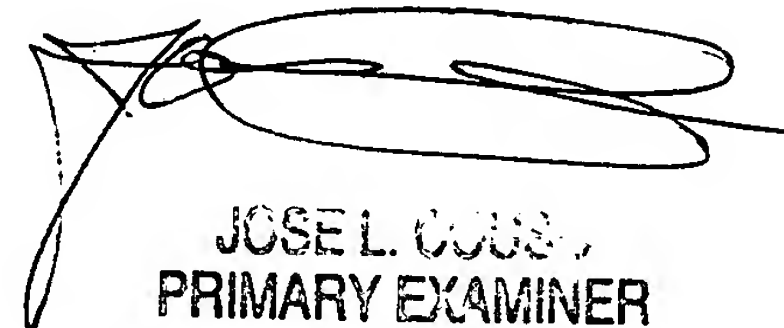

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jose L. Couso whose telephone number is (571) 272-7388. The examiner can normally be reached on Monday through Friday from 6:30 to 3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bhavesh Mehta, can be reached on (703) 272-7453. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the USPTO contact Center whose telephone number is (703) 308-4357.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
